IC 1	query	Interactive / complex / 14
IC 2	title	Trusted connection paths
IC 3 IC 4 IC 5 IC 6 IC 7 IC 8	pattern	Enumerate all unweighted shortest paths on knows edges from person1 to person2. person1: Person id = \$person1Id p1
IC 9 IC 10 IC 11 IC 12		personA: Person hasCreator hasCreator c: Comment replyOf → post: Post personA: Person hasCreator hasCreator c1: Comment replyOf → c2: Comment
IC 14	desc.	Given two Persons, find all (unweighted) shortest paths between these two Persons, in the subgraph induced by the knows relationship. Then, for each path calculate a weight. The nodes in the path are Persons, and the weight of a path is the sum of weights between every pair of consecutive Person nodes in the path. The weight for a pair of Persons is calculated based on their interactions: • Every direct reply (by one of the Persons) to a Post (by the other Person) contributes 1.0. • Every direct reply (by one of the Persons) to a Comment (by the other Person) contributes 0.5. Note that interactions are counted both ways (e.g. if Alice writes 2 Post replies and 1 Comment reply to Bob, while Bob writes 3 Post replies and 4 Comment replies to Alice, their interaction score is 2 × 1.0 + 1 × 0.5 + 3 × 1.0 + 4 × 0.5 = 7.5). Return all the paths with shortest length, and their weights. Do not return any rows if there is no path between the two Persons.
	params	1 person1Id ID 2 person2Id ID
	result	personIdsInPath [ID] C identifiers representing an ordered sequence of the Persons in the path pathWeight 64-bit Float C
	sort	1 pathWeight ↓ The order of paths with the same weight is unspecified
	CPs	3.3, 5.3, 7.2, 7.3, 7.5, 7.7, 8.1, 8.2, 8.3, 8.6
	relevance	This query looks for a variable length path, starting at a given Person and finishing at an another given Person. This is a more complex query as it not only requires computing the path length, but returning it and computing a weight. To compute this weight one must look for smaller sub-queries with paths of length three, formed by the two Persons at each step, a Post and a Comment.
