query	BI / delete / 1		
title	Remove person and its personal forums and message (sub)threads		
pattern	Person Section Person Person Id = \$personId Person Pe		
	Message b invoke delete operation 6 (Posts) or operation 7 (Comments) hasCreator hasModerator hasModerator b invoke delete operation 4		
desc.	Remove a Person and its edges (isLocatedIn, studyAt, workAt, hasInterest, likes, knows, hasMember, hasModerator, hasCreator). Additionally, remove the Album and Wall Forums whose moderator is the Person and remove all Messages the Person has created in the rest of the Forums (Groups).		
params	1 personId ID		
CPs	9.3, 9.4, 9.5		
relevance	 Removal of a Person removes Forums of type "Walls" and "Albums" but not "Groups", which can continue if even the founder has left the network. For Groups, the hasModerator edge is deleted. We have discussed various approaches to appoint a new moderator, e.g. 1. choose member at random from the set of existing group members or 2. the member with the oldest group join date becomes the moderator. However, to keep the generator and the workload simple, currently no moderator is selected, leaving the group without a moderator. Removal of a Person removes all Posts/Comments they are creator of this could result in the removal of a Comment in the middle of a thread. 		

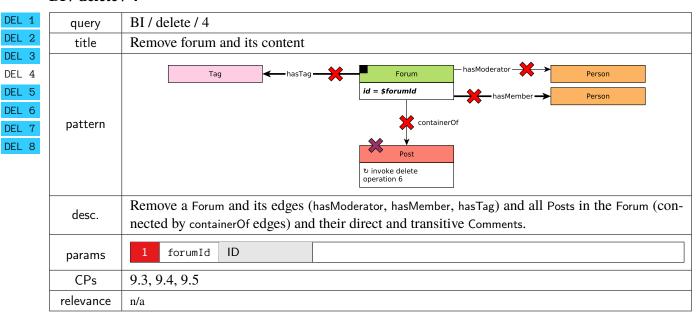

BI / delete / 2

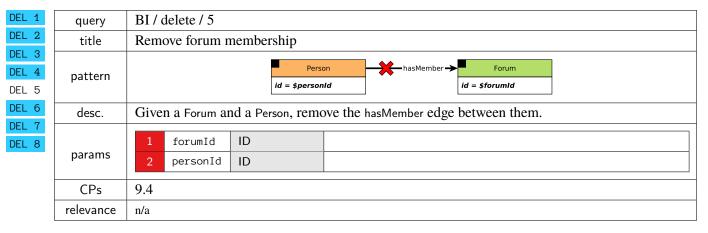

query	BI / delete / 2		
title	Remove post like		
pattern	Person $id = \$personId$ $id = \$postId$		
desc.	Given a Person and a Post, remove the likes edge between them.		
params	1 personId ID 2 postId ID		
CPs	9.4		
relevance	Removal of a likes edge is a rare event, e.g. people accidently liking a Post, this can be reflected by the relative frequency of the operation.
