For each pair of countries, calculate the cost as a sum of cases #1-5. Cases that have a match add to the final score with the specific value. Each case only counts once, multiple matches do not increase to the score. Consider all pairs of people (person1, person2) such that one is located in a City of Cotry1 and the other is located in a City of Country country2. For each City of Country count the highest scoring pair. The score of a pair is defined as the sum of the subscores at the following kinds of interaction. The initial value is score = 0. 1. person1 has created a reply Comment to at least one Message by person2: score + 2. person1 has created at least one Message that person2 has created a reply to: score 3. person1 and person2 know each other: score += 15 4. person1 liked at least one Message by person2: score += 10 5. person1 has created at least one Message that was liked by person2: score += 1 Consequently, the maximum score a pair can obtain is: 4 + 1 + 15 + 10 + 1 = 31. This query has two variants based on whether the input parameters are selected as (close countries) or uncorrelated (far countries).	ry1, return warded for = 4 re += 1
params A: correlated with parameter country2, i.e. the counclose and there are many Persons visiting both Counclose and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and there are few Persons visiting both Counclose are afar and the persons visitin	tries. untries
